16. Abstract A compliance test series was conducted on the subject 2005 Dodge Magnum 4-Door Wagon, NHTSA No. C50302, in accordance with the specifications of the Office of Vehicle Safety Compliance Test Procedure No. TP-201U-01 for the determination of FMVSS 201U compliance. The testing was conducted at MGA Research Corporation in Troy, Michigan on November 16-17, 2004. Test failures identified were as follows: <p align="center">None</p> The data recorded seems to indicate that the 2005 Dodge Magnum 4-Door Wagon tested appears to comply with the requirements for FMVSS 201U which were set forth by the National Highway Traffic Safety Administration.

1.0 PURPOSE OF COMPLIANCE TEST

The purpose of this head impact compliance test was to determine whether the subject vehicle, a 2005 Dodge Magnum 4-Door Wagon, meets the performance requirements of FMVSS 201U, Occupant Protection in Interior Impact - Upper Interior Head Impact Protection.

Tests were conducted during November 16-17, 2004 on a 2005 Dodge Magnum 4-Door Wagon, manufactured by DaimlerChrysler Corporation (Canada).

All tests were conducted in accordance with the U. S. Department of Transportation, National Highway Traffic Safety Administration's Laboratory Test Procedure TP-201U-01 dated April 3, 1998 and the corresponding MGA Research Corporation's FMVSS 201U procedure number MGATP201U_FRAME#2 dated March 20, 2003.

All tests were conducted at MGA Research Corporation in Troy, Michigan and were performed by MGA engineers and technicians. The FMVSS 201U impactor test machine was used to conduct the testing. Target locations were determined by using a Coordinate Measurement Machine in conjunction with the MGA EZ-Target™ program and MGA procedure MGATP201U_Test Series dated March 20, 2003.

2.0 COMPLIANCE TEST DATA SUMMARY

The 2005 Dodge Magnum 4-Door Wagon was equipped with A, B, C, and Rear-pillars, grab handles above each rear passenger door, an adjustable seat belt anchorage on each B-pillar, and a utility console on the front, center upper roof.

Upon completion of targeting the test vehicle, twelve (12) targets were chosen to be impacted based upon engineering judgment and certification test data provided by DaimlerChrysler Corporation. Targets were chosen which appeared most likely to give high HIC(d) values. The twelve (12) targets chosen were:

AP1	BP1	OP2	UR1
AP2	BP2	SR3-1	UR2
AP3	FH1	SR2(B)	UR7

The 2005 Dodge Magnum 4-Door Wagon tested appears to comply with the performance criteria for FMVSS 201U. The HIC(d) measured using the Part 572L (Free Motion Headform) was below 1000 for each tested component.

TABLE 2-1

SR3-1	Left	270	32	23.5	401	391	20	2 Left
UR1	Left	270	34	23.9	419	335	50	7 Left
UR2	Right	90	25	23.9	525	475	82	0
UR7	Right	33	50	23.9	850	641	18	13 Left

Above and left/right refers to the position relative to reference pt. 0 where the target made contact with the Free Motion Headform. See the diagram below for details.

POST TEST COMMENTS:

The following description lists any post-test damage or other test observations for each target.

BP1 Left: Headliner displacement.

UR2 Right: Headliner displacement.

REMARKS:

The targets listed were impacted in the following order:

Right: AP3, AP1, UR2, SR2(B), FH1, OP2, UR7

Left: AP2, UR1, BP2, BP1, SR3-1

The 150 mm rule was observed for targets horizontal to each other and the 200 mm rule was observed for vertical components.

UR7	3055.8	443.6	1529.2	33	50	No	--	Yes

As determined using the Procedures specified in S10.1-10.13.

REMARKS: Target RP2 on each side was found to be greater than 600 mm rearward of the rearmost SgRP and therefore exempt from testing, per S6.3(b).

Target UR2 was located on the left side of the vehicle for the targeting procedure as entered in the above table. The target was moved to the right side of the vehicle for testing because of the minimum distance between targets restriction. The horizontal approach angle was changed to 90°.

4.0 TEST EQUIPMENT LIST AND CALIBRATION INFORMATION

The following section lists the test equipment for the compliance test series. Items marked with an asterisk are calibrated by an external lab. An additional summary table is given for the pre and post-test calibration data for the Free Motion Headforms. The temperature trace to confirm testing was conducted between 66°F and 78°F (19°C - 26°C) is included in Appendix A. Calibration certificates can be found in Appendix B.

TABLE 4-1 LIST OF ITEMS USED

ITEM	MANUFACTURER NAME	MODEL #	FUNCTION OF ITEM	ACCURACY	CAL. INTERNAL
Head Drop Tower (includes test frame and DAS)	MGA Research Corp.	MGA-100-DC	FMH Calibration	N/A	N/A
Accelerometers	Endevco	7264-2000	Acceleration Data	±0.5%	6 months

CALIBRATION CERTIFICATE

Sensor Information	Reference Sensor Information
Name: 2000 G Accelerometer	Name: Reference Accelerometer
Model: 7264-2000	Model: 301M09/484B
S/N: J35841	S/N: 862/247
Capacity: 2000 G	Capacity: 170 G
Calibration Date: 11/9/04	Calibration Date: 5/11/04
	Calibrated By: Chris Vega/PCB Piezotronics, Inc.

Test Reference Number: A0422

New DLR (100k, Units: G): 92.6

StdDeviation (%): 0.092

% Difference in DLR (New vs. Old): -0.35

Temperature (°F): 72

Humidity (%): 24

Performed By:

Approved By:

All calibrations are traceable to the National Institute of Standards and Technology. Estimated uncertainty of the measurement is $\pm 0.3\%$. All certification data and equipment are on file for inspection at your request. Best uncertainties represent expanded uncertainties expressed at approximately the 95% confidence level using a coverage factor k=2.

Certificate of Calibration

Equipment Information

Customer:	MGA Research Corporation 446 Executive Drive Troy, MI 48063	Model:	Pro 360
		Serial Number:	NONE
		Manufacturer:	Milwaukee
		Description:	Protractor
System ID:	MGA00069		
Customer Asset No.:	MGA00069 (012904)		

Calibration Information

Calibration Date:	1/29/04	Procedure Used:	33K6-4-1597-1/99
Calibration Due:	1/29/05	Calibrated to:	NFR SPBC
Calibration Interval:	12 Month		
Revised In Test:	No/Fail	Temperature:	20 °C
Revised In Test:	Yes/Pass	Humidity:	28 %RH
Performed On Site:	No		
Calibration Limit Spec:			

The Uncertainty of the Measurements Pertaining to This Calibration are Estimated to be: Various

¹ Pass/Fail or In/Out of Tolerance statements are opinions only of the person performing the calibration based on data from measurements in the form they were made, procedure utilized, professional experience, and the uncertainty associated with this calibration. It is ultimately up to the user of this equipment to determine if this form meets their specific requirements for accuracy for its intended application.

Calibration Standards Used

System ID:	Model:	Serial:	Manufacturer:	Description:	Date Recd:
00498	CT481B	61201054	Omega	Thermochromidigraph	7/28/04
07748	2 X 2"	13528	TRU-STONE	Gauge Surface Plate	2/19/04
10493	SP-66-S1	9902	Schubert Tool, Inc.	Gage Plate	2/17/06
09156	CHALLENGER S1 P 09156		AA JAMISON	Gage Blocks	3/5/04

Any calibration issued and due date/cycle during if issued, is at the request of the customer. Due to the fact that many variables may affect shift of repeated values over time there is no warranty implied that this item will maintain it's stated accuracy through the end of this interval.

This Calibration has been performed per requirements of ISO 17025-2002. Expanded results are from standards with uncertainties that are traceable to the International System of Units (SI), derived from physical constants, and measurements, national measurement standards, or compared to consensus standards. Measurement uncertainty is expressed as a confidence level of approximately 95% (coverage factor k=2).

Certificate of Calibration

Equipment Information

Customer: MGA Research Corporation
446 Executive Drive
Troy, MI 48063

Model: AP 20
Serial Number: E33603-0213
Manufacturer: Dettco
Description: Scale

System ID: MGA00081

Customer Asset No.:

Calibration Information

Calibration Date: 3/24/04
Calibration Time: 3/24/04
Calibration Interval: 12 Month
Rec'd In Tok.¹: Yes/Pass
Returned In Tok.¹: Yes/Pass
Performed On Site: No

Procedure Used: 33K6-4-72-1/98
Calibrated to: MFR SFEC
Temperature: 24 °C
Humidity: 37 %RH

Calibration Limitation:

The Uncertainty of the Measurements Pertaining to This Calibration are Estimated to be: $(0.006 + 0.01\% \text{ Ind}) \text{ lb}$

¹ Pass/Fail or In/Out of Tolerance statements are opinions only of the person performing the calibration based on data from measurements at the time they were made, procedures utilized, professional experience, and the uncertainty associated with this calibration. It is ultimately up to the user of this equipment to determine if this item meets their specific requirements for accuracy for its intended application.

Calibration Standards Used

System ID:	Model:	Serial:	Manufacturer:	Description:	Date Due:
09126	CT485B	61201050	OMEGA	Thermohm/Digital	5/12/04
07580	CLASS C	07580	TRUEMNER	WEIGHT SET	9/11/04

Any calibration interval and due date of this device, if stated, is at the request of the customer. Due to the fact that many variables may affect drift of reported values over time there is no assurance implied that this item will maintain its stated accuracy through the end of this interval.

This Calibration has been performed per requirements of ISO 17025-1999. Reported results are from standards with an accuracy that are traceable to the International System of Units (SI), derived from physical constants, national measurement standards, or compared to customer standards. Measurement uncertainty is expressed as a significance level of approximately 95% (coverage factor k=2).
